

## ENVIRONMENTAL POLICY

Fluid Maintenance Australia (FMA) is committed to protecting the environment and promoting an environmentally friendly culture to minimise any potential harmful effects on the environment.

FMA is committed to;

- Ensuring compliance to environmental laws and regulations
- Implementing and following processes that do not adversely affect the environment, including developing and improving operations and technologies to minimise waste and other pollution to minimise health and safety risks and potential environmental hazards.
- Liaising with supply-chain partners in order to ensure environmental control of the inputs of our products and processes
- Produce awareness to its employees in regards to environmental management to enable employee responsibility in relation to environmental impacts
- Ensure continual improvement is carried out on this policy to ensure effective environmental commitments

All levels of management are responsible for;

- Promote efficient use of energy, water and other natural resources
- Encourage employee suggestions aimed at improving environmental performance
- Review and report on environmental performance or potential issues

Overall FMA will continually strive for optimum utilisation of resources by minimising waste and ensuring a harmonious relationship with the environment that is both preventative and protective.
